

THD SURGY MINI LIGHTSCOPE

Use

The SURGY LightScope anoscope is a SINGLE-USE medical device indicated for anorectal canal analysis and surgery.

General description

The SURGY LightScope anoscope combines a practical and lightweight anoscope and a powerful integrated LED light source in one single-use device in order to give you a clear and detailed view of the inspection area.

The SURGY LightScope anoscope is ready for use and does not require any other equipment for use. The light source is activated simply by pulling out a tab.

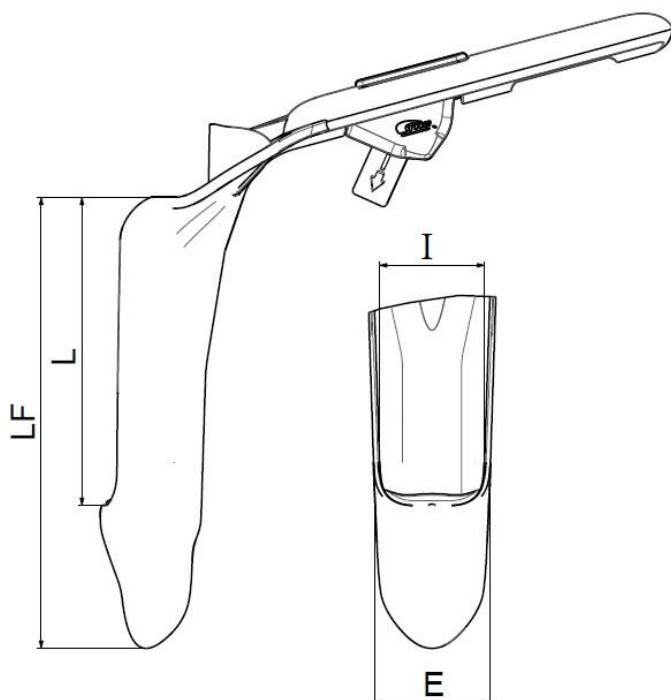

Features

- Made of medical-grade polycarbonate
- Complies with the biocompatibility requirements established by ISO 10993
- **Self-light, with a permanent integrated light source**
- Atraumatic insertion profile
- Extremely compact
- Ready to use
- Lightweight (40g)
- Class I CE device
- Individually packed
- Latex-free

**Advantages:**

- Does not require an additional light source
- Does not require preparation before use
- Eliminates the risk of cross-contamination
- Compact and easy to handle
- Mini-invasive and atraumatic
